

Application for academic position in the EVSSAR board

Dear Catherine,
dear EVASSAR board,
dear EVSSAR members,

With this letter I would like to apply for an academic position in the EVSSAR board for the election in June 2016.

I am a member since 2013. The first EVSSAR meeting I attended was in 2008 in Vienna. Ever since, I have found EVSSAR to be the society with the most professional, enthusiastic and also most gentle and helpful people. The congresses are always perfectly organized and provide a program that attracts practitioners and academics, as well. The new approaches of EVSSAR including the research grants will help to make great progress in small animal reproduction.

Because of these experiences, I wish to engage more and want to give some contribution to the society. Some of my ideas are the development and implementation of a case database that enables members of EVSSAR to insert and collect data on rare cases. The results may over time help to better understand these diseases including diagnostic procedures, treatment options and outcomes concerning health and fertility. Furthermore, EVSSAR may be an interesting platform for conducting small but practice oriented research projects. A first idea could be assessing inter observer agreement of the evaluation of vaginal smears by specialists. Such small approaches could be easily performed on congresses may help to find differences or standardize procedures.

I would highly appreciate if I would be accepted as a candidate for the election. I am looking forward to the congress in June.

Sincerely

Sebastian Arlt
