Roquebrune Cap Martin, the 14th of April 2015
Subject: Application for a practitioner EVSSAR Board position.

Dear Colleagues and Friends,

I am an ECAR diplomate currently work as practitioner ins the south-east of the France.
I work in two units, in a clinic where I work as generalist and also as small animal reproduction specialist; and in a new veterinary referral centre where I am the responsible of the small animals reproduction service.

I know EVSSAR since my residency program. I took part at my first EVVSAR congress in Toulouse 2013. During that I participate at the ECAR residents' session with a short communication.

I appreciate the efforts that EVVSAR makes to improve the knowledge about animal reproduction. Our discipline needs to progress with research. At the same time the demand of a by breeders and owners is increasing. EVSSAR plays an essential role in the diffusion of the results from the latest researches the field-working veterinarians.

The fields of my interest are neonatology, paediatrics and infertility. I am also interested from collective health management of animals groups. For long time, in small animal practice, the vet considered as patient the single animal presented to him by the owner. In my opinion a new collective approach is essential to understand and manage many problems of fertility in kennels and catteries.

I would like very much to actively participate to EVSSAR with my motivation and my experience. This would give me the chance to work in a stimulating environment originated by the collaboration and the discussion with colleagues from different countries and educations.

Thank you for considering my request

Yours faithfully,

Andrea Del Carro
