Prof. Dr. Iris M. Reichler

Position Information

The Vetsuisse Faculty is one of the leading veterinary medical university centers in Europe. We offer high quality education covering 24 different disciplines for veterinary specialists. The Zurich Animal Hospital makes a major contribution to the daily care of sick and injured animals from all over Switzerland and its neighbor countries.

We offer a part-time position (60-80%) for an experienced Veterinarian to join our team at The Section of Small Animal Reproduction of the Vetsuisse Faculty Zurich. Besides the clinical work, the candidate should be interested in teaching and conducting clinical research.

We offer the possibility for higher academic qualification (*Habilitation*). Together with other team members, the candidate will be responsible for the management of our daily patients, as well as for managing the emergency cases, including C-sections and treatment of critically ill neonates.

Requirements:

- A valid DVM license, preferably with a college degree in ECAR or ACT or an experienced FVH veterinarian
- Experience and interest in theriogenology based research; the applicant will be expected to undertake applied and/or clinical research in feline or canine theriogenology
- Clinical and surgical experience in feline and canine theriogenology
- Enjoying clinical teaching (students, residents, interns)

At least basic German language skills are welcome for the daily clinic work.

The salary will be according to the guidelines of the University of Zurich.

We look forward to receiving applications by email to Prof. Dr. Iris M. Reichler (ireichler@vetclinics.uzh.ch) until 31.03.2019 including comprehensive CV with letter of motivation and references (all documents as one PDF file).
