To President and Members of the European Veterinary
Society for Small Animal Reproduction Board

Subject: Application for the EVSSAR Board Practitioner Member Position

Dear President and Esteemed Members of the EVSSAR Board,

I am writing to express my enthusiastic interest in joining the EVSSAR Board. Having actively participated in every EVSSAR congress over the years and having established meaningful connections with several esteemed members of your society, I am motivated to take my involvement to the next level by contributing my expertise and passion to the board.

My decision to apply for this position stems from three key motivations, each representing a significant aspect of my dedication to the field of small animal reproduction. First and foremost, reproduction has been the focal point of my professional journey, encompassing a diverse range of clinical experiences. I am not only committed to addressing immediate clinical challenges but also to pushing the boundaries of what is possible through pioneering research and innovation.

The second facet driving my candidacy is my unyielding aspiration to lead and participate in impactful research endeavors. The realm of small animal reproduction holds vast uncharted territories, and I am resolute to contribute to its advancement. As a dedicated practitioner who has witnessed firsthand the complexities of this field, I am well-poised to identify areas where scientific exploration is needed most urgently.

However, it is my profound enjoyment of sharing knowledge with colleagues and breeders that propels me most ardently. As I chart my professional path, it is my aspiration to cultivate a culture of continuous learning, both within my immediate circles and beyond. I am eager to organize congresses, workshops and courses, where aspiring veterinarians and seasoned practitioners alike can access cutting-edge techniques, fostering a new generation of skilled professionals in this captivating domain.

With over five years of experience at the prestigious Centre d'Etudes en Reproduction des Carnivores (CERCA) and the distinction of becoming an ECAR Diplomate, I have honed my skills under the guidance of experts like Prof. Alain Fontbonne and Dr. Cindy Maenhoudt. This tenure has not only solidified my prowess in small animal reproduction but has also

expanded my perspective on the global landscape of veterinary science. Furthermore, my venture, Anirepro, established in collaboration with fellow specialists, showcases my commitment to translating knowledge into practice. Through Anirepro, I am contributing to the broader veterinary community by providing specialized reproductive services in several hospitals and clinics.

The opportunity to serve as an EVSSAR Board member is an honor I earnestly seek. The society's international network, rich experience, and unwavering commitment to advancing small animal reproduction resonate profoundly with my personal and professional aspirations. I am eager to contribute my unique vantage point, leveraging the expertise garnered from my international experiences to fortify EVSSAR's mission.

In closing, I humbly request your consideration of my application. It would be an immense privilege to collaborate with visionary minds on the EVSSAR Board to usher in a new era of progress in small animal reproduction. I extend my heartfelt gratitude for your time and attention, and I stand ready to address any queries you may have.

Thank you for your thoughtful consideration.

Warm regards,

Zuzanna Niewiadomska-Marquette
